

# Permanent Thermochromic Change Pigments & Coatings

High Temperature Activated, White to Color Pigment, Paint & Ink

## Applications Include:

- High Temperature Alerts
- Surface Temperature Management
- Safety Engineering
- Process Control
- Metal Fabrication and Annealing

## Highlights and Features:

- Permanent White to Color Ink
- Water based Screen and Flexo Ink/Pigment
- Gradual Color-Change 60°C - 200°C
- Temperature Range: 60 - 200°C
- Best on White Background
- Two Standard Colors:  
White to Magenta  
White to Black
- Call for Custom Color/Temperature

As Temperature  
Increases, Color  
Density Increases
