REACH REGULATIONS

Re: Chromazone and Kromagen Products

Named products are thermochromic pigments, supplied either as pigment slurries, inks, master-batch or powders.
Composition varies according to range and type.

As part of our on-going commitment in ensuring that we comply with all legislative requirement, we have implemented the full requirements listed under the REACH Directive and the substances listed under SVHC.

Chromazone FF Powder products comply with REACH Annex XVII.

We are happy to confirm that all the products from the ChromaZone range (reversible thermochromic slurries and Powders) are not currently manufactured using chemicals showing on the SVHC list as updated 25th June 2020.

The SVHC list can be obtained at the following:

<https://echa.europa.eu/candidate-list-table>

We trust that the above meets with your requirements and should you require any further clarification then please do not hesitate to contact us.

Thanking you in advance

Yours sincerely
