

# DISCOVER SOLAR SYSTEM

## How to Use

Simply rubbing or touching the location applies heat to the planet and the shape and name magically appears, and then disappears as it cools down. To clean simply wipe with a damp cloth until surface is clean. Can be used over and over again.

Ideal for small groups and individual study, Discover Solar System Cards are self checking and designed for multiple uses. Students interact with the subject and delight in the magical appearance of the answer. Encourages practice and repetition.

Thermosmart™ color changing educational products are made possible through the use of Liquid Crystals which are chemical compounds and mixtures that exhibit the mechanical properties of liquids and the optical characteristics of solids.
