

MAGIC LC

How to Use

Simply rubbing or touching the sheet applies heat and a colorful impression magically appears, and then disappears as it cools down.

To clean simply wipe with a damp cloth until surface is clean.

Can be used over and over again.

Great for kids to test and compare classroom objects skin for heat sensitivity.

Visually demonstrate body heat.

Thermosmart™ color changing educational products are made possible through the use of Liquid Crystals which are chemical compounds and mixtures that exhibit the mechanical properties of liquids and the optical characteristics of solids.
